

In this unit I will ...

- listen, read, research, and write about foods and how to keep healthy.
- practice making sentences with and or but.
- talk about a place in Egypt.
- read and listen to a short story.
- distinguish long and short vowels.
- write instructions.
- research and make a presentation.

Did you know?

In our bodies, the right lung is larger than the left lung.

6 Read the text and put the sentences in the correct order

Our respiratory system

We use our **respiratory system** when we **breathe**. We need oxygen in our bodies.

We breathe in air through our nose. Our diaphragm goes down. It pulls air into our lungs.

In the lungs, the oxygen from the air goes into our blood. Our heart **pumps** this blood around our body. The diaphragm goes up. It pushes air with **carbon dioxide** out of our lungs. We breathe out.

The d	iaphragm	pulls	air	into	our	lungs.	

- The diaphragm moves up and pushes the air out of our body.
- The heart pushes the blood around our body.
- 1 We breathe through our nose.

Listen and read

Mom: Look at all these animals that live in our country.

Sara: Look at the crocodile, it's huge!

Tarek: Huge and scary!

Sara: I think the spider is scarier.

Mom: Yeah, but spiders are very helpful. They eat insects.

Farmers like spiders.

Sara: Ok, what about the snake and the crocodile?

They're dangerous, aren't they?

Mom: Yes, that's true, but they do a very important job.

They eat insects, birds and lizards. This controls the

Tarek, Mom, and Sara

number of these small animals.

Tarek: Eagles do the same job.

Sara: The pelican eats small fish.

Mom: You're right! We sometimes think some animals are

scary or ugly, but they are all important.

Listen again and answer

- 1 Does Tarek like crocodiles?

Which animals do Tarek and Sara not talk about?

What do you think?

- Which animals are scary?
- 2 Which animals are dangerous?
- 3 Which animals are cute?
- Only cute animals are important. Do you agree?

I think crocodiles are scary, but they control the numbers of small animals.

LESSON 2 CLIL: SCIENCE

Work in pairs. Discuss these questions

- 1 What Egyptian desert animals do you know?
- 2 Is it easy to live in the desert? Why? What problems do animals have?
- 2 Look quickly at the fact files and answer
 - 1 Which animal has big ears?
 - 2 Which animal can fly?
 - 3 Which animal lives for about forty years?

Animal fact file

Fennec Fox

Where does it live?	In the deserts of North Africa			
How tall is it?	20 centimeters			
How heavy is it?	about 1 kilogram			
How long is it?	30 - 40 centimeters			
What does it eat?	insects, small lizards, mice			

The fennec fox lives in the desert. It's smaller than other foxes. Its ears are big, really big! The fennec fox needs big ears to hear insects and small animals. During the day, it's hot in the desert. The fox loses heat from its ears. At night it's cold. The fox's thick fur keeps it warm.

Animal fact file

Steppe Eagle

How long does it live?	around 30 - 40 years
How heavy is it? around 3 kilogra	
How long is it?	from wing to wing around 170 centimeters

Look at the eagle flying. It's beautiful, isn't it? The steppe eagle travels from Europe to Africa in winter. It lives in very big, open areas.

It eats other birds, small mammals and rabbits.
When it opens its wings, it's longer than you!
The female is bigger and heavier than the male.

3 Read the fact files.
Say one fact about each animal

A fennec fox is 30 centimeters long.

- 4 Read the fact files again. Choose the best answer
 - 1 Why does the fennec fox have big ears?
 - a So it can see small animals and insects.
 - b So it can hear small animals and insects.
 - 2 Why do you think the steppe eagle travels from Europe to Africa in winter?
 - Because Africa is bigger than Europe.
 - b Because Africa is warmer than Europe.

What did you learn? Work with a partner. Ask and answer

What does the fennec fox eat?

It eats insects, small lizards, and mice.

Think!

Which animals scare you? Can you say why?

6 Think and write

Look at the snake. What is it doing? How does it feel? Why? The snake is lifting its head up. It probably feels scared. It saw someone or something.

Look at the eagle flying. What can it see? How does it feel?

LESSON 3

- What do you know about camels? Discuss with your partner
- 2 Read about camels and check your answers. What is surprising about camels?

Camels are amazing! They're beautiful, strong animals. They help us to carry things and people to cross the desert. Their milk is delicious. We can use their fur to make clothes!

Camels are perfect for the desert. Here's why:

feet so they can walk water for a long time.

Camels have large, flat Camels can live without Camels have special

ways to close their noses and eyes to stop the sand from coming

But be careful! Camels are very **noisy** and they can get angry.

Read and listen. Where is the fish at the end of the story?

The Pelican and the Bear

A pelican and a bear are in the river. They are very hungry. They are both looking at a big, juicy fish.

The bear reaches for the fish. It lifts its paw.

The pelican opens its beak. It is ready to take the fish out of the water.

The bear sees the pelican. The pelican sees the bear.

'Excuse me,' the pelican says, 'that's my fish.'

The bear is surprised and angry. 'Pelican, look at my **claws**. Now look at my teeth. That's my fish.'

The pelican looks scared. 'I'm sorry, Bear, 'I'w whispers.

The bear is stronger than the pelican.

The bear is happy because it has a big fish for dinner.

Then the bear looks down. Oh no! It can't see the fish. It can't see the pelican.

'Pelican, where are you?' Bear shouts.

There is no pelican. But he can hear the happy pelican flying away with the fish in its mouth..

Work with a partner. Ask and answer

1 Read and number

- A plant produces **pollen** in a flower. It uses pollen to make new seeds. The seeds travel away from the plant. The seeds need a new place to grow.
- 2 Some seeds can move in the wind. These seeds are very light.
- 3 Some seeds can **stick** to an animal's fur. The animals move and take the seeds with them.
- 4 Other seeds can **float** on water to find a new place to grow. These seeds are usually big and light.

4 Look and read. Is a plant cell big or small?

A plant is made of millions of cells. The plant cells are very, very small. **Chloroplasts** make the plant green. You can only see them with a **microscope**. The green plant cells make food for the plant. They use sunlight, **carbon dioxide** and water.

plant cell

5 Read the text again. Choose a or b

- 1 What makes the plant green?
 - a chloroplasts
 - b sunlight
- 2 When does the plant make its food?
 - a during the day
 - b at night
- 3 What does the plant use to make its food?
 - a carbon dioxide and oxygen.
 - b carbon dioxide, sunlight and water.

Read and listen to the text. How do plants make the air clean?

How plants clean air

People need oxygen so we can breathe. In big cities, the air is **polluted** because of factories and cars. There is a lot of carbon dioxide in the air.

Green plants take carbon dioxide from the air. The plant cells need carbon dioxide to make food for the plant. The plants also produce oxygen. Plants in our houses and parks give us oxygen to breathe.

In some cities, like Paris and Milan, people are growing plants on apartment buildings. These plants keep the buildings cool and help with air pollution. The people who live in the buildings can breathe cleaner air.

Read the text again. Match the words with the definitions

- 1 polluted
- a gas in the air that people need to breathe
- 2 oxygen
- b a gas in the air that green plants use to make their food
- 3 carbon dioxide
- c dirty from factories and cars

Lucas lives on a farm in the United States. It is a very special farm. Forty years ago, the land was very **dry**. There was no farm. No one wanted to live there.

Lucas's grandparents lived in the city, but they didn't like it. They didn't like the polluted air and the noise. They wanted to have a farm. They decided to buy some land.

At first, life was very difficult. They worked very hard and they planted millions of seeds. They used rainwater to water the seeds. They needed about a billion liters of water a year.

They grew many fruits like oranges and lemons. They brought animals to the land. They planted trees and flowers.

Today, Lucas lives on the farm with his mom and dad. They are very happy and they have a good life. They are very the land green.

Egypt's cotton

Egypt is very famous for its cotton. It is probably the best cotton in the world. This is because the Egyptians grow it along the Nile, and the Nile soil is very rich in nutrients. The Egyptian climate is humid, that is wet. The sun shines almost every day. All these conditions are excellent for very good cotton.

Egyptian cotton is special because its fibers are longer than other cottons.

Egyptians make fantastic **bedsheets** and **towels** from the cotton, as well as other things. The cotton goes to countries all over the world, because many people love Egyptian cotton.

Read and listen to the text about chocolate

Where does chocolate come from?

People in Mexico were the first to make chocolate about 1,000 years ago. Spanish people brought chocolate to Europe in the 1500s. Now people make chocolate all around the world.

Do you know where chocolate comes from? It comes from the **cacao tree**. Today, most cocoa comes from trees which grow in Africa.

Farmers plant cacao seeds in the soil. The seeds need water and sunshine. The plants grow taller. The fruits of the cacao tree are called **pods**.

When the pods are ready, the farmers open them and **dry** them in out the seeds.

The cocoa seeds go to a **factory**. In the factory, the workers add sugar and milk. Then they press it down to make a **bar** of chocolate. Then it's yummy to eat!

 - 3 Why is a broken wire dangerous?

Amira the electrician

This is Amira, she's an electrician. She studied and practiced for three years before she became an electrician. She knows how to work safely with electricity.

Interviewer: Tell us something interesting about electricity.

Amira: Did you know, electricity travels faster than 300,000 kilometers/second!

In a storm we sometimes see a flash of lightning. That flash has enough electricity for 1,000 families for a year!

Interviewer: Is electricity dangerous?

Amira: Yes, very dangerous.

If we get an electric shock, we can't control our bodies. It can also **burn** us. Electricity is always trying to go into the ground. It travels easily through water and our bodies are

Interviewer: How can we use electricity safely?

Amira: Never touch anything electrical with wet hands.

Look, this is a **broken wire** – don't use it. You can get an electric shock or start a fire!

- If you're not using your computer or television, unplug it.
- Use natural light in the day.
- 1 What do you do to save electricity?

LESSON 3

Read Which people help you every day?

Workers in our community

Do you like helping people? In our community we can all help each other. Many of the people around us have special skills to help us. Together, we help each other and make our city or village a nicer place to live.

For example, a bus driver helps a builder to get to work. When the bus breaks, the bus driver

needs the mechanic to fix the bus. All the local homes and businesses need a mail carrier to deliver the packages and letters. We all need the garbage collector to take away our garbage and keep our streets clean.

We can all help each other. It's the right thing to do and it makes you feel good.

We all like different things. Some jobs are interesting for some people, but they are boring for other people. All the jobs are very important.

2 Read and think. Do you agree with these sentences?

Three cousins

Lara, Talia, and Amir are cousins, but they are all very different.

When Lara was a child, she loved to experiment. She was very curious. She always carried a screwdriver and she opened old radios, cell phones, and anything that had electricity. Her favorite question was How does it work? She learned about safety with electricity.

When Talia was a baby, she played with blocks. She put one block on top of another. When she was older, she started making things. She made a little house for her dog and a bed for her sister's doll. She always carried a tape measure and a pencil. Amir was always very patient and he liked helping people. Sometimes, big brothers can get angry at their little brothers, but Amir was never angry. He played, he helped, and he explained things all the

Think about a mail carrier's job. What are the good

and bad things about the job?

2 Read and complete the table

My name is Sherifa. In class this week, we're talking about the good and bad things about different jobs. My aunt is a mail carrier in America. I talked to her about her job and she told me some of the pros and cons.

Pros and cons of being a mail carrier.

What's it like to be a mail carrier?

There are some good and bad points about the job.

On one hand, mail carriers are outside all day. This is great when the weather is good, but it's not fun when the weather is very hot or wet and cold. Mail carriers walk all day and get a lot of exercise. They also speak to a lot of people. This is a nice part of the job. Everybody likes getting mail, so everyone likes meeting the mail carrier. On the other hand, there are also some bad things to think about. Being a mail carrier is not an easy job. The mail bag is very heavy. It can give some mail carriers a backache. Another bad thing is that they wake up very early. My aunt starts work at 6 o'clock in the morning.

LESSON 2 CLIL: SOCIAL STUDIES

- 1 Think and answer
 - How many people work in a hotel? What are their jobs?
- 2 Read and check your answers

Industry

The things we make, buy, and sell are all part of the country's **economy**. Our economy is divided into **industries**, such as fishing, farming, tourism, etc.

In every industry there are thousands of people and many different jobs. For example, let's think about the tourism industry in Egypt.

When tourists arrive in Egypt, they need a hotel and they need a bus or a taxi to take them to the hotel.

Many people work in the hotel. The hotel needs electricians and plumbers to fix problems, cooks to make food, and cleaners to keep the hotel clean.

Local businesses need the hotel, too. For example, the hotel buys food from farmers. Everything in the hotel comes from other businesses.

The hotel pays a salary to the workers. The workers use their salary to buy food, clothes, and for transportation. Some of their salary goes to the government to pay for things like roads and schools. When we work, our salary helps our community and the whole country.

3 Look at the words in bold. Match the words to the meaning

- a economy
- 1 money paid to people who work
- b industry
- 2 a collection of businesses that work together
- c salary
- 3 the group of people who make rules for the country
- d government
- 4 the way a country makes and uses money

Think!

Why do people work? Read and check (✓) or cross (✗)

- They get a salary.
- They can help people.
- They can relax.
- They can make things.

What other reasons are there for working? Discuss with a partner.

LESSON 3 CLIL: SCIENCE

- 1 Look at the pictures. What do you think the story is about?
- 2 Read. Is a mango tree renewable or non-renewable?

Two mango trees

Sara and Malak are sisters. Each sister had a beautiful mango tree next to her house. Every year, the sisters ate beautiful mangoes. Their children played under the trees.

One day, Malak said, 'I don't need mangoes. I need money. Let's **cut down** my tree. I can sell the wood.'

She cut the tree and she sold the wood. Malak was happy.

Next year, Sara's mango tree grew bigger and bigger. It gave Sara more mangoes.

Malak looked out of the window. There was no mango tree. She had no mangoes and no more wood.

'Don't worry,' said Sara. 'Plant this mango seed, and it will grow into a big tree.'

Read again and answer the questions

- 1 Why does Malak cut down the mango tree?
- 2 What are the disadvantages of cutting down the mango tree?

D	Non-renewable

7 Look and read. What non-renewable and renewable resources does the article talk about?

Different energy resources

We are using more and more electricity. We can make electricity from many different energy resources. Today, 80% of electricity comes from non-renewable resources. These are coal, gas, and oil.

Why is that a problem?

We take coal, oil, and gas from the Earth, but we cannot make more. When we burn non-renewable resources to make electricity, we also cause pollution.

How can we use renewable resources?

Renewable energy sources are everywhere. We can make

electricity from wind, water, and the sun. We do not need to burn these resources, so there is no pollution.

To make electricity from renewable energy sources, we need new solar farms and wind farms. A solar farm needs a lot of sunshine. A wind farm

needs a lot of sunshine. A wind farm needs a big space. To make wave energy, you need the sea.

8 Read again and discuss

- 1 What are the problems with coal, oil, and gas?
- 2 Is Egypt a good place to find renewable energy sources?
 Why?

LESSON.H

Skim the story quickly. Who are the main characters?

Fresh fish van

There's an old fisherman in my village. He drives around the village in an old van. He likes his job. He has fun. He shouts, 'Fish! Fresh fish! Come and get your lovely fresh fish.'

One day, he was in front of my house. He couldn't start his van. He was sad and disappointed.

My mom saw the man. It was hot in the sun. She wanted to help.

Mom's dad (my grandpa) was a mechanic. He taught her all about cars. She looked at the old van's **engine**.

'It is a very simple problem. I can fix it,' said Mom. The old fisherman was surprised.

Then, we heard the sound of the engine. His van was fixed!

'Thank you,' the fisherman said. He gave Mom ten fresh fish.

Is teaching the best job in the world?

When people ask me, 'What do you want to do?' I answer: 'I want to be a teacher. For me, it's the best job in the world.'

For a teacher, every day is different. Students always ask surprising questions. Teachers need to think quickly. They need to encourage their students. They need to be very patient. They work for many hours every day. It's hard work, but it's exciting. A teacher can change their students' lives.

A good teacher is always ready to learn. Teachers teach their students, but students also teach their teachers. Everyone in the class knows different things.

Every adult remembers a special teacher. Ask your parents. Did they have a favorite teacher? Why was that teacher special?

In the Taxi with Uncle Sami

By Susannah Reed Illustrated by Alice Larsson

PICTURE DICTIONARY

Zahra and Zein are watching a nature **program** with their parents. It's a very interesting program. It's all about hippos.

'I love animals,' says Zahra. 'I want to be a vet when I'm older.'
'That's a great idea,' says Mom. 'A vet is a very important job.
What about you, Zein? Do you want to be a vet?'
'I don't think so,' says Zein.

'What do you want to be, then?' asks Dad. 'A doctor?' 'Or a dentist?' asks Mom.

'I don't know,' says Zein. I just can't decide!'

'I know,' says Mom. 'Why don't you both go and stay with Uncle Sami? He has lots of friends. You can **find out** about their jobs. Then you can decide, Zein.'

'That's a great idea,' says Dad.

Uncle Sami is a taxi driver. On the first day of their visit, he takes the children to see his friend Adel. Adel is a vet. He works in a **nature reserve**.

'This is Zahra and Zein,' says Uncle Sami. 'Zahra wants to be a vet.'

'Great!' says Adel. 'Come on then. You can both help me with the crocodiles.'

One of the crocodiles has something in its stomach. Adel gives the crocodile some medicine for it to sleep.

'It's **asleep** now,' Adel says. Then he puts his hand into the crocodile's mouth.

'Look,' says Adel. 'It's a plastic bottle. People shouldn't throw garbage. It's dangerous for the animals.'

'What's the matter, Zein?' asks Zahra.

'I love animals,' says Zein, 'but I don't want to be a vet.'

Uncle Sami drives to a farm.

'Come and meet my friend, Fayez, and his wife Mervat,' he says. 'They look after animals, too. You can help on their farm.'

First of all, the children help Mervat with the animals. There are some baby goats without mothers. Mervat and Zahra mix some special milk. Zein feeds the babies with a bottle.

Then they help with the **maize**. The maize plants are growing tall and strong and the maize is nice and yellow. The children pick lots of maize. It's hard work!

The children load the maize onto a tractor.

'Can I drive the tractor?' asks Zein. Fayez laughs.

'No, I'm sorry,' he says.

The next morning, Zahra is playing on her phone. Uncle Sami has an idea.

'Do you like computer games, Zein?' he asks.

'Yes,' says Zein. 'Computer games are awesome!'

Uncle Sami's cousin Faten is a software engineer. She designs computer programs. The children go to her office.

'You can try these new games,' says Faten. The children have a lot of fun.

Zein has an idea for a game. It's a puzzle game. He draws some ideas, but it isn't easy. Zein isn't happy with his game.

'Oh dearl' he says, 'I love games and puzzles, but I don't want to be a software engineer.'

'It's OK,' says Uncle Sami. 'Come and meet my friend Basem. He's a plumber.'

'A plumber?' says Zahra.

Basem is in Mr Sameh's apartment. He is fixing some **pipes** under a **sink**. The children help him. There are lots of pipes. 'It's like a puzzle!' says Zein.

Something falls out of an old pipe. It's a ring.

'That's my wife's ring!' says Mr Sameh. 'Thank you for finding it.'

'You're welcome,' says Basem. 'It's all part of the job.'

That night, Uncle Sami drives the children home in his taxi. They are both happy and tired.

'Do you know what you want to be now, Zein?' asks Dad.

'Yes, I do,' says Zein. 'I want to be like Uncle Sami. He has got the best job. He goes to so many interesting places. I want to be a taxi driver!'
